

# HURREN, LANGMAN & JAMES COLLECTION

## Architecture Museum, University of South Australia

### INDUSTRIAL BUILDINGS AND FACTORIES

SERIES 254

The engineering partnership of Hurren, Langman and James consisted of Frank Hurren ASASM (1899-1992), William Wilson Langman and Wesley Hughes James ME (Adel), FSASM, MIE Aust, (b1898). “During 1928 Hurren established the first sustained consulting structural engineering practice in Adelaide to meet the small but growing need for more specialised reinforced concrete structural expertise. His practice survived the hard years of the Depression due to [Hurren’s] drive and self-motivation. For over twenty years, the practice of Hurren, Langman and James was the pre-eminent consulting structural engineering firm in Adelaide, highly respected for its innovation and the quality of its work” (Stacy 2005 p87). On 10 August 1956, on the retirement of Frank Hurren, the partnership of Hurren, Langman and James was dissolved. James and Langman continued as Langman and James from 1 July 1956.

Frank Hurren studied at the S.A. School of Mines and Industries then worked in Sydney. On his return to Adelaide he worked with both E. Stone and M.S. Stanley, and later, in partnership with Langman and James he designed the structures of many Adelaide buildings, such as Shell House, Elizabeth House, the Bank of N.S.W. and the Savings Bank Building. William (Bill) Langman was Mayor of Burnside 1967-68 and was very active in the Adelaide Rotary Club. Wesley Hughes James studied at the University of Adelaide and became a Junior Assistant Engineer in the Engineer-in Chief’s Department in 1922. He then went to England and America, returning to Adelaide in 1927 where he gained the Degree of Master of Engineering in 1931. James worked with W. Francis before joining with Hurren and Langman, where he designed such structures as the Pt. Augusta and Osborne Power Stations. He was Chairman of the Institution of Engineers (S.A. Division) in 1944 (Cumming and Moxam 1986).

#### Collection description

Hurren, Langman and James were a structural engineering firm who worked with many architectural firms in South Australia and interstate. This collection of records came from the Mortlock Library of South Australia, at the State Library of South Australia as a specialist group of business records. It consists of plans and drawings, calculations for jobs, correspondence, specifications and books. As these records, when accessed by the archivists, had no discernible order, they have been organised into groups related to the functions of the buildings described, then the owner’s name. They are a valuable addition to the Architecture Museum because they contain work by architects not previously represented in the collections. Plans are stored in plan file drawers unless designated as 'Box' when they are stored in the archive boxes.

## HURREN, LANGMAN & JAMES COLLECTION

### Architecture Museum, University of South Australia

This series relates to work carried out on manufacturing premises. The plans are organised under each company's name, irrespective of location. The archivist has given these records their order.

#### In Series Order

Series No	Description	Location	Architects/E ngineers	Date	
S254/1/1-5	F.W. Hercus Manufacturing Co			1942-53

### Electricity Trust of South Australia, Osborne Power Station

**S254/16**

Power Station at Osborne South Australia, for the Adelaide Electric Supply Company. S254/16/1 - 243 and 253 - 281 are Plans stored in the plan file drawers. Where records are marked Box they are stored in archive boxes.

<u>SERIES</u>	<u>DESCRIPTION</u>	<u>DATE</u>	<u>PERSONNEL</u>
S254/16/1-243	Power Station at Osborne	1942-1959	Hurren, Langman and James, S.W. Matters, licensed surveyors; Alwin Fisher Domestic Engineers, Nth Adel.; Engineering and Water Supply (E. & W.S.) Dept. Adel.
S254/16/1	Location of sheet piling, plan, ink on trace, OB107	29 Oct 1942	Hurren, Langman and James
S254/16/2	Approximate ground levels on river frontage, section, pencil on trace	June 1942	Hurren, Langman and James
S254/16/3	Location of terminal structures for circulating water, plan, ink on trace, OB104	June 1942	Hurren, Langman and James
S254/16/4	Location of railway siding into Osborne 'B' Power Station, plan, ink on trace, OB101	Jan 1942	Hurren, Langman and James
S254/16/5	Location of railway siding into Osborne 'B' Power Station, plan, ink on trace, OB101	Jan 1942	Hurren, Langman and James
S254/16/6	Outlet terminal structure for circulating water ducts, section, elevation, plan, ink on trace, OB103	April 1942	Hurren, Langman and James
S254/16/7	Sketch perspective of Osborne 'B' Power station, pencil on paper	15 Aug 1942	Hurren, Langman and James
S254/16/8	Layout of office block, plan, elevation, section, pencil and ink on paper	24 June 1942	Hurren, Langman and James
S254/16/9	Positions and sections of boreholes, plan, section, ink on paper, OB106	19 Sept 1942	Hurren, Langman and James

**HURREN, LANGMAN & JAMES COLLECTION**  
**Architecture Museum, University of South Australia**

S254/16/10	Inlet terminal structure for circulating water ducts, section, ink on paper, OB102	April 1942	Hurren, Langman and James
S254/16/11	Calculations for sheet piling, diagram, ink on paper	April 1942	Hurren, Langman and James
S254/16/12	Section through tank annexe and plan of shift engineers office, pencil on paper, OB113	26 Oct 1942	Hurren, Langman and James
S254/16/13	Location of diverted 6 inch water main, plan, pencil and ink on trace, OB108	6 Nov 1942	Hurren, Langman and James
S254/16/14	Part layout plan of footings, ink on trace	1 Dec 1942	Hurren, Langman and James
S254/16/15	Steel trusses, details, ink on trace, OB112	Feb 1943	Hurren, Langman and James
S254/16/16	Details of No. 1 lift shaft, sections and details, ink on trace, OB116	July 1943	Hurren, Langman and James
S254/16/17	Basement walls of lift No. 1, section, pencil on paper	March 1943	Hurren, Langman and James
S254/16/18	Reservoir site, plan, ink on linen	14 July 1943	S.W. Matters, Licensed surveyor
S254/16/19	Engine room basement alteration of floor framing, plan, section, detail, ink on trace	Dec 1943	Hurren, Langman and James
S254/16/20	Section through annexe, pencil on trace	14 May 1943	Hurren, Langman and James
S254/16/21	Outline of coal bunkers, section, ink on trace	July 1943	Hurren, Langman and James
S254/16/22	Column schedule and details, ink and pencil on trace, OB111	Feb 1943	Hurren, Langman and James
S254/16/23	Steel framing plan and section at annexe roof, ink and pencil on trace, OB115	8 April 1943	Hurren, Langman and James

### General Motors Holden Pty Ltd

S254/45

General Motors Holden was originally a coach building firm in Adelaide, then became a body building firm called Holden Motor Body Builders and after amalgamation with the American car firm, General Motors, became General Motors Holden or GMH. Records include plans for the first body building works of Holden and later new building called Plant 11 at Woodville, South Australia, built in 1943. This building housed the conveyor belt line for bodybuilding of GMH cars. It was called 'The Body Shop'. In the late 1950's the first 2 hydraulic robots used for industry in South Australia were housed here. GMH outgrew the site at Woodville and moved to Elizabeth.

SERIES NO	DESCRIPTION	DATE	PERSONNEL

### G H Michell & Sons

S254/82

In 2001 G H Michell and Sons are wool and skin merchants. The firm began with the original GH Michell migrating from England to set up his wool washing business at Yuldara . After a disastrous fire the firm moved to Hindmarsh where it continued to grow until it out grew the site. A new factory was opened at Salisbury to process wool and the leather processing plant remained at Thebarton/Hindmarsh on the site of the original Peacock and Co, a colonial wool washing firm. The firm is now an international one with smaller wool or leather processing premises all over the world. The firm is still in the hands of the descendants of the original GH Michell and a descendant has always had the initials GH.

### Metropolitan & Export Abattoirs

**S254/90**

In the colonial period of SA there were many small abattoirs attached to individual butchers' shops. As the population increased, trade grew until the SA government set up an abattoir at Dry Creek to handle all metropolitan butchering. They were also the largest exporters of meat. The abattoirs were disbanded in the 1990s and butchering for the metro area was outsourced.

**ETSA Adelaide and suburbs (was Adelaide Electric Supply Co)                      S254/108**

In the first instance, Adelaide Electric Supply Co furnished the electrical supply in Adelaide. Some larger towns had privately owned electricity generators that provided power to a few homes and streetlights. Thomas Playford, as State Premier, expanded the electrical supply to the country areas by making the private company into a public utility called the Electricity Trust of SA. Some of the plate covers in Adelaide's streets still bear the original private company's name.

<u>SERIES NO</u>	<u>DESCRIPTION</u>	<u>DATE</u>	<u>PERSONNEL</u>
S254/108/1	<u>Electric Supply Co</u> Calculations, for substation at Post Office Place, Adelaide. Marked 7(2). Box.	n.d.	Hurren Langman & James.
