Leisure Swim
9% respondents

Top CSQ Benchmark Performance Attributes

Weak CSQ Benchmark Performance Attributes

▲0.5

Have suitable parking

▼-0.4

Have experienced / knowledgeable instructors

▲0.4

Be well-maintained

▼-0.1

Provide adequate child minding

▲0.3

Have clean pool water

■ 0.0

Have responsive staff

*Detailed view of Centre's Performance vs. Expectation and comparison to CERM-PI Benchmark can be found on Pages 7-9

What your customers said⁺:

"Easy access and parking. Good showers with lots of room. Bars available to aid walking"

"I find your Swimming lessons reservation system confusing and have heard complaints from other parents about it being disorganised and poorly communicated."

"I enjoy the ambience of the pool, the staff are respectful and friendly. The cafe has great coffee"

⁺ All customer comments and suggestions are attached in Section 5

Introduction and Methodology

INTRODUCTION

In choosing CERM PI as a research partner you have secured the application of stringently tested, secure and industry specific methods of evaluating your centre's performance. CERM PI manages the only national benchmarks for public sports and leisure facilities, run annually to ensure currency and evaluated regularly in partnership with industry to ensure relevance.

This report incorporates results from these benchmarking exercises with your centre's results. Compare your results against last year's survey, and the CERM PI benchmarks for a quick and reliable check of your centre's performance over time, and compared to industry. CERM PI protocols, developed to meet strict UniSA ethics standards, allow the opportunity to compare with external industry benchmarks, whilst ensuring the security and privacy of sensitive information.

This report uses three separate sets of performance indicators (PIs) developed for sports and leisure centre management. These PIs were derived from industry input including focus groups across Australia & NZ, as well as the international research literature; and are reviewed on an on-going basis.

This report comprises five (5) main sections:

Customer Relations and Satisfaction

The first section of the report presents respondents' overall level of satisfaction with the centre, as well as the level of likelihood they would recommend the centre to others. The survey included some additional comment opportunities for respondents which are presented in the final section of the report.

Customer Service Quality (CSQ) Indicators

The CERM PI CSQ model, tailored to leisure centres, incorporates two main dimensions of service quality: 17 items that focus on facility and provision aspects of the centre and another 5 items that explored aspects of staffing in the centre.

Benefit indicators

A second major focus of the CERM PI indicators is the benefits the end user or customer receives from their visit to the centre. This section presents respondents rating of importance and achievement of 9 benefit attributes.

Customer demographics

Demographics of respondents will enable the centre to have an in-depth view of who their customers are, looking at age, gender, and usage preferences of the customers. The section also reports the key activities customers participate in at the centre.

Comments and Suggestions

The final section of the survey presents the additional comments and suggestions from customers of the centre. These include any problems faced during their visit to the centre and overall suggestions for the centre.

METHODOLOGY

Data for this report was collected using an online questionnaire under the guidance of the appropriate protocols issued by CERM PI®, University of South Australia.

Customers to the centre were asked to complete the survey online. Those customers who were members of the centre were sent a link to an online survey. The survey measured: customer satisfaction with facilities/operations and staff, benefits from centre usage, their level of satisfaction & advocacy and questions relating to their usage and their demographics.

Analysis

The questionnaire was developed to provide Council and centre staff and management with diagnostic value in the area of customer profiles and service quality management. Council and centre staff have an in-depth understanding of the wider environmental context in which the facility operates and are best placed to interpret the results provided in this report. The study should not be treated in isolation but be used as part of the total information on which management decisions are based.

Note: Percentage totals may not equal (+ or -) 100% due to rounding.

Note: CERM PI 202x benchmark is a cumulative median of the data collected across all centres from 202x-202x.

Confidentiality

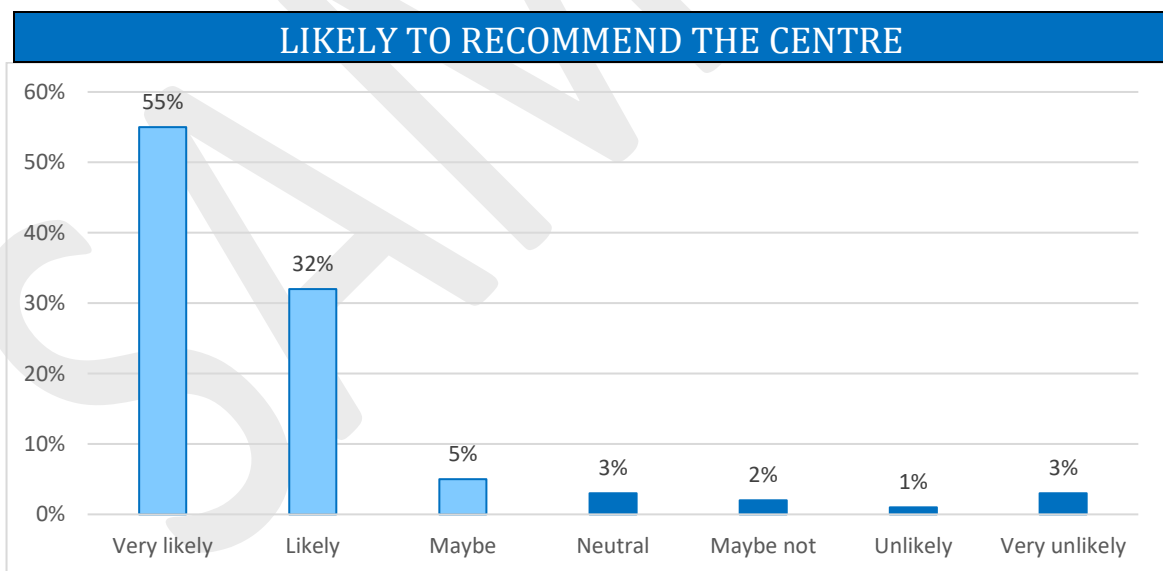

The information contained in the report is the property of the client and CERM PI, and may not be reproduced or transmitted in any form without their consent. CERM PI may utilise information gathered for further research and education and is committed to do so whilst protecting the confidentiality of the client. Outcomes of research efforts can be reported in professional forums.

1. Customer Satisfaction and Relation

CUSTOMER SATISFACTION						
2%	1%	3%	2%	8%	38%	46%
Very dissatisfied	Dissatisfied	Somewhat dissatisfied	Neutral	Somewhat satisfied	Satisfied	Very satisfied

- **92%** of all of respondents suggested they were somewhat to very satisfied with the centre overall.
- The mean satisfaction for Aquatic Centre is **6.1** (slightly above “Satisfied”) out of a 7-point scale.
- **34%** of respondents experienced a problem at the centre, which is **lower** than the CERM PI benchmark
- **92%** of all respondents suggested either “Maybe”, “Likely” or “Very Likely” to recommend Aquatic Centre to others.

PROBLEM RESOLUTION		
	202x	CERM PI
	%	%
Problems experienced	34	39
Problems reported	46	62
Problems resolved	35	28

2. Customer Service Quality

In the questionnaire respondents were asked to rate expectations and perceptions of performance in relation to attributes of customer service quality (CSQ). The scale used for this section ranges from 1 ('disagree') to 6 ('very strongly agree').

Expectations refer to the extent to which customers believe a particular service attribute should be provided at the centre. High expectations tend to represent higher priority CSQ attributes. Low expectations may indicate customers have limited interest or need for this CSQ attribute.

The expectations and the performance means are used to calculate the **Customer Service Quality Gap** (CSQ Gap) for each CSQ attribute; the extent to which performance does not correspond to expectations.

The **performance** mean measures how a service attribute is perceived to be performing. High performance means indicate a service quality attribute is perceived by customers to be well delivered. A low performance mean may identify a potential problem requiring monitoring. Alternatively, it may be due to a unique circumstance of the centre (e.g. shared use of public parking facilities).

The **Customer Service Quality Score** (CSQ Score) reflects the service quality gap as a percentage, allowing for more direct comparison with other customer feedback such as overall satisfaction with the centre and willingness to recommend the centre.

SUMMARY

- Respondents rated "Have clean pool water" and the centre being "Clean" and "Well-maintained" **highest on expectations**
- Respondents rated the centre having "Presentable staff" and being "Well-maintained" **highest on performance**
- **Aquatic Centre's** best performing attributes compared to the CERM PI CSQ Benchmarks were "Having suitable parking" and the centre being "Well-maintained"
- **Aquatic Centre** achieved an overall service quality score of **91%**

* The Overall Service Quality result is calculated by dividing the combined averaged performance scores by the combined averaged expectations *100

3. Customer Benefit Analysis

The questionnaire asked the respondents to rate their level of importance and achievement in relation to a list of benefits. The scale used for this section ranged from 1 ('not at all') to 5 ('very high').

The **importance** mean measures the relative importance of particular benefits as a reason for attending this centre.

The **importance and achievement** means are used to calculate the '**Benefits gap**' for each attribute – that is, the extent to which achievement does not correspond with the importance rating.

The **achievement** mean indicates the extent to which the benefits were achieved as a customer of the centre.

Use of benefits: Understanding the benefits achieved by your centre customers will aid in the design, promotion and delivery of opportunities appropriate for different target groups at your centre.

BENEFIT ATTRIBUTES: EXPECTATION, PERFORMANCE AND BENCHMARK COMPARISON

BENEFITS ATTRIBUTES	Importance 202x - 2x	Achieved 202x - 2x	Benefits Gaps 202x - 2x	Benchmarks 202x - 2x	Benefits Gaps 202x - 2x
Improved health	4.2	3.9	-0.3	-0.4	▲ 0.1
Improved physical fitness	4.2	3.9	-0.3	-0.4	▲ 0.1

▲ Above 0 Gap | ■ Neutral Gap | ▼ Below 0 Gap

SUMMARY

- Respondents rated “Enjoyment” and improved “Health”, and “Physical fitness” **highest on expectations**
- Respondents also rated “Enjoyment” and improved “Health”, “Fitness” and “Well-being” **highest on performance**
- **Aquatic Centre’s** best performing attributes compared to the CERM PI CSQ Benchmarks were improved “Well-being” and “Performance in competitive sport”

4. Respondent Demographic and Usage

- **41%** of all respondents suggested **“Lane (lap) swimming”** as their main activity at the centre, while 18% suggested it was a secondary activity
- **34%** of all respondents suggested **“Learn to swim”** as their main activity at the centre
- **61%** of all respondents attend the centre **with family and/or friends**
- **95%** of all respondents travel to the centre in a **private car**
- **38%** of all respondents visit the centre **once per week**
- **34%** of all respondents visit the centre between **9am and noon**

MAIN ACTIVITY UNDERSTAKEN AT THE CENTRE

	MAIN (%)	SECONDARY (%)
Leisure swimming	9	27
Learn to swim	34	12
Lane (lap) swimming	41	18
Aqua exercise	1	1

5. Comments and Responses (Open-ended)

Note: This report shares only a sample of the comments, along with a count of some of the most mentioned words in each section below (top themes in comments). A full list of comments for all open-ended questions is provided as an attachment with this report.

“BEST ASPECTS ABOUT THE CENTRE”

- **“Pool”** was mentioned ~ 215 times by respondents when discussing the best aspects about the centre. Responses were mostly generic or specified the type of pool (e.g., hydro, warm pool, lap pool, and along with the sauna and spa).

“Clean, good pools, slides fun for my child.”

“Spacious pools, great therapy pool, plenty of change rooms and warm showers.”

“The lap pool, I really enjoy it when 50 meter lap lanes are available.”

“Hydro pool area facilities!”

“Beautiful building and warm water pool.”

- **“Classes”** were mentioned ~ 110 times when respondents discussed the best parts of the centre. Respondents would usually state the class they enjoyed, while others complimented the variety of classes and group classes. Some comments would shoutout the name of instructors from classes.

“The wide range of choices of exercise classes, gym equipment and facilities.”

“Meeting new people and enjoying a coffee together after great classes.”

“Group fitness classes that are challenging but also fun.”

“Variety of classes, calm and friendly environment.”

- **“Gym”** was also mentioned ~ 90 times and responses, like pool, responses simply pointed to the gym and equipment as being a positive at the centre. Some pointed to the ability to swim, go to classes, and use a gym all in one place as being a particular positive aspect to the centre.

“The gym is well equipped and spacious.”

“Love the space, it never feels crowded, friendly gym staff.”

“The range of equipment in the gym.”

“PROBLEMS EXPERIENCED AT THE CENTRE”

- Contrasting the positive comments above, **“Pool”** was mentioned ~ 145 times as being a problem at the centre. Many of these responses focused on the cleanliness of the pools and pool areas, the use of chemicals in the pools, temperature of some pools, lane organization of the pools, and pool areas often being closed.

“I feel that the hydro therapy pool could be cleaned. There is lots of bits of gravel on the ramp and there is dirty sludge on the railing on the ramp and a sludge line on the tiles at the shallow end.”

“No lap lane availability for the 50m pool and no one could assist. Was told to look online and when I did that it had not been updated for 2 weeks. This has happened a few times now. Needs to be rectified. Want to swim in 50m pool not a 25m and the pool never seems to be 50m.”

“Sand (always) and band aids (sometimes) in pool.”

“Pool is too cold for daughter who does lessons.”

- Once again, contrasting above, **“Classes”** (mentioned ~ 120 times) and **“Class”** (mentioned ~ 75 times) were discussed in regards to issues experienced at the centre. Some comments were issues with specific classes, but most often concerns focused on the unavailability of classes and the booking system for classes (i.e., issues booking in, vacancies in classes when they say full online, cancellation of classes).

“Cannot access aqua deep classes when boom is at 25mt level, as no access except cut in side steps. Not sufficient aqua classes. Demographics of ABC is average age of 50+, so more aqua classes needed than other areas of XYZ. Most people have to be tech savvy and set alarms for 8 days to the minute before booking into an aqua class. Classes often book out within 15 minutes”

“Difficulty booking into some classes such as core and more as they Bookout very quickly.”

“Issues with my step sons class being cancelled/changed 3 times and poor communication (at the beginning). Haven’t had any issues last few months.”

“When you sign up for a make up class then you want to change it again you can’t! Very frustrating when there’s spots available in other classes. Also if your class falls on a Monday which is quite often a public holiday you should be given opportunity for a make up class.”

- **“Staff”** was mentioned ~ 70 times and **“Instructors”** was mentioned ~ 50 times. However, in highlighting this, the staff per se were not always singled out as being an issue, but communication from staff with members was. For instance, many responses discussed sending emails or calling with concerns or ideas, to not be responded to or follow-uped with. And related to instructors, while some had negative experiences with

instructors from particular programs (e.g., swimming lessons), many discussed the problem of having inconsistency with instructors in classes.

“Constantly. Rude staff and [unknowledgeable] Long waits in queue, never an apology. Managers or senior staff hiding in the back and never [acknowledging] the queues or taking ownership. Nothing friendly and 'local about it'. Appalling swimming instructors where on numerous times it has actually been dangerous! ... “

“Billing issues, booking issues, poor responsiveness in problem solving, relatively unhelpful staff in these instances, drawn out periods of resolution.”

“Inconsistent swim instructors. Very unsettling for young children.”

“I find It difficult to book into an aqua movers class due to the classes being full. Yet when I actually get into a class there seems to be several people that don't turn up. As this and boxing are my only uses for my membership I may review my options.”

“The teachers are always changing for the swimming lessons and it is difficult to have consistency for the kids in the lesson.”

How can the results be used?

Each year CERM PI service quality reports are conducted for many Australian and New Zealand leisure industry sectors. Some of the ways your organisation may benefit from the information in this report include:

- Share and discuss the results of the report with staff at the Centre.
- Promote key results to Customers and thank them for their contribution.
- Incorporate the information into management plans, KPIs and contracts where relevant.

Consider further analysis. Does this report highlight something you'd like to know more about? We can help with this.
